Plant in a What Pot?

Put these plants in pots! Look at the work by artist Will Carey for inspiration - will you design your own pot, or will you use a jar, mug or jug? Maybe you want to stack them up! Underneath these three plants, draw pots for them to live in.

I did not know that...

...plants give off an electrical charge that changes when they are pollinated. They send out distress signals to other plants, like trees communicate via root fungi.
